

## Coronavirus Notification and Guidelines

We are open, and we offer a safe and secure environment for all of our patients and staff.

- Our facility is a medical and surgical office with the strictest SOP – Standard Operating Process for disinfection. Every room and all equipment are wiped down and disinfected after each patient.
- Highest quality air purification -- hydroxyl ion system for continuous bacterial and viral decontamination of air and surfaces.

Additional steps we are taking to make sure everyone is safe from Covid-19

- CDC guidelines are being strictly observed and enforced
- Temperature check for each patient prior to entering the office
- Maximum of 3 patients in the office at a time.
- Each patient is isolated in a separate room (disinfected surgical office)
- Patients should come to our office without companions. (Unless there are special circumstances.) Please call the office and speak to our front office for details. (772) 539-9556
- No emergency sick visits. If you feel you have Covid-19 symptoms, please contact the department of health at 866-779-6121 and your primary physician. You can also call Cleveland Clinic Corona hotline 772-419-3360
- If you have an emergency situation, please call 911.
- Please keep in mind those even mild symptoms, sore throat or a cold can be a mild manifestation of COVID-19.
- Stay home and self-isolate to avoid infecting patients or advanced age or other comorbid medical conditions

=====

### **Our office is open for the following consultations and treatments:**

- Immune enhancement protocols
  - Recommendations for vitamins, minerals, homeopathic and herbal remedies
  - Immune enhancing recommendations
- Intravenous (IV) Vitamin C and Super-Immune-vitamin infusions.
- Immune Enhancing thymic peptides (thermismooth thermosyn)

### **NOTE:**

We are accepting new patients, but we require an initial assessment with Dr. DeMarta and a full blood /lab work up to ensure that high dose IV vitamin infusions are safe.

- We are taking a more assertive treatment for the highest risk patients that include age 65+ older and those with preexisting chronic medical conditions such as: cardiac disease, chronic respiratory conditions, autoimmune disorders, cancer patients, patients on

immunosuppressive medications for chemotherapy and patients with suppressed immune system. **Contact us for details...** (772) 539-9556

- **Tele-Medicine**

We are actively providing telemedicine to our patients. To comply with HIPPA regulations, the first visit for new patients must be a face to face consultation.

=====

We support and abide by CDC guidelines. We encourage you to stay informed.
